UPDATED FILING RECEIPT

OC000000013251051

Date Mailed: 07/15/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Applicant(s)

Ari Juhani Peltola, Oulu, FINLAND;

Assignment For Published Patent Application

Nokia Corporation;

Domestic Priority data as claimed by applicant

This appln claims benefit of 60/468,471 05/06/2003

Foreign Applications

If Required, Foreign Filing License Granted: 06/07/2004

Projected Publication Date: 11/11/2004

Non-Publication Request: No

Early Publication Request: No

Title

Method and apparatus for receiving site selection diversity transmit (SSDT) signal in a wideband code division multiple access (WCDMA) system

Preliminary Class

455

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

REQUEST FOR CORRECTED FILING RECEIPT

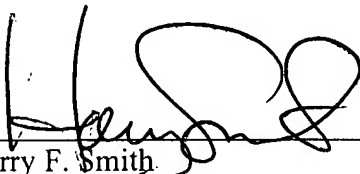

Sir:

Please correct the title for this application as follows:

Method and Apparatus for Receiving Site Selection Diversity Transmit (SSDT) Signal in a Wideband Code Division Multiple Access (WCDMA) System

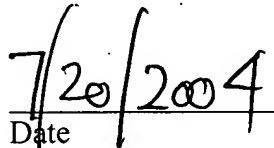

Attached are copies of the first page of the Application showing the correct title and a copy of the official Filing Receipt for this application.

Respectfully submitted,

Harry F. Smith

**METHOD AND APPARATUS FOR RECEIVING SITE SELECTION
DIVERSITY TRANSMIT (SSDT) SIGNAL IN A WIDEBAND CODE
DIVISION MULTIPLE ACCESS (WCDMA) SYSTEM**

CLAIM OF PRIORITY FROM COPENDING PROVISIONAL PATENT

5 APPLICATION:

[0001] This patent application claims priority under 35 U.S.C. §119(e) from Provisional Patent Application No.: 60/468,471, filed 05/06/2003, the disclosure of which is incorporated by reference herein in its entirety.

TECHNICAL FIELD:

10 [0002] This invention relates generally to cellular telephone systems, terminals and user equipment (UE) and, more specifically, relates to handover and soft handover techniques in a CDMA-based system.

BACKGROUND:

[0003] There is currently specified a procedure known as SSDT (Site Selection Diversity
15 Transmit power control) for use in a receiver of a WCDMA (Wideband Code Division Multiple Access) based system. The SSDT is a macro diversity method used in the soft handover mode, where the UE selects one of the cells from its active set of cells to be the primary cell. All other cells in the active set are then classified as being non-primary cells. The main objective is to transmit on the downlink (base station (BS) to UE) only
20 from the primary cell, thus reducing the interference caused by multiple transmissions from other BSs in the soft handover mode. During conventional soft handover the UE can be simultaneously receiving transmissions from more than one BS.

[0004] In order to select a primary cell, each cell is assigned a temporary identification (ID), and the UE periodically notifies connecting cells of the primary cell's ID. The
25 non-primary cells selected by the UE switch off their transmission power.
